

C² CURE

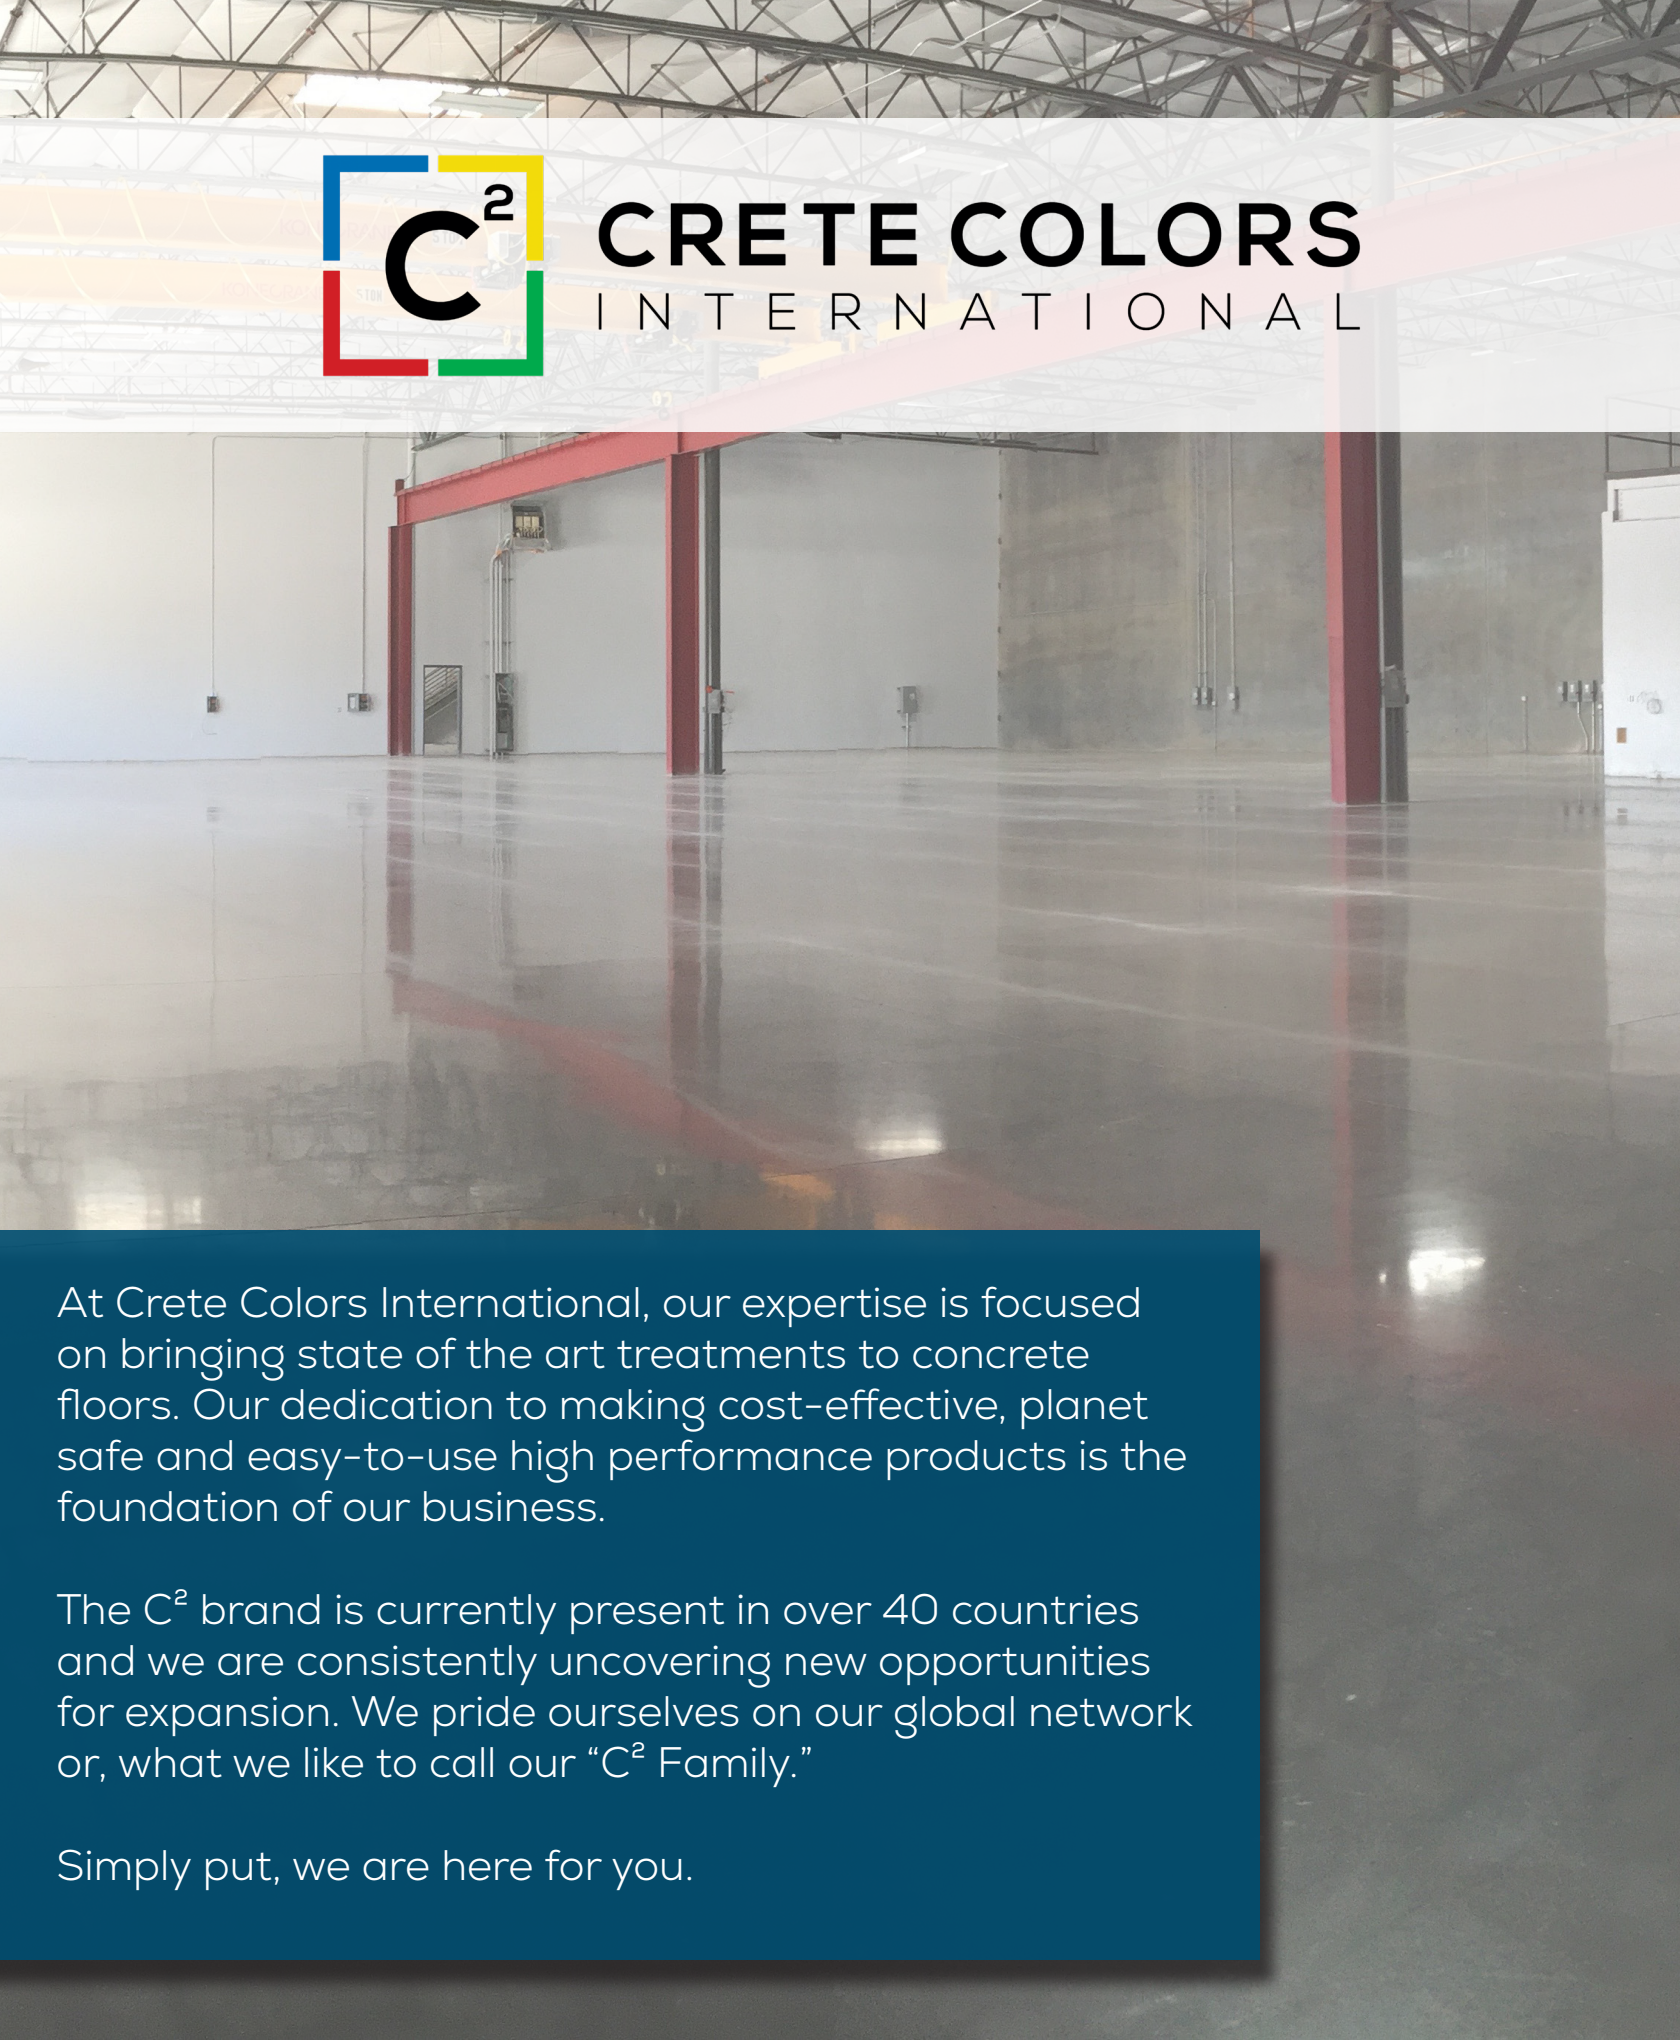

All-in-one curing agent and lithium densifier

C² Cure allows you to spend less time at the job by consolidating the curing and densification process into a single step. This formula is designed for fresh concrete and will cure the concrete in four weeks while densifying + dustproofing. This formula improves hydration of newly placed, smooth, steel trowel-finished concrete.

- Meets ASTM C-309 Standard & ASTM C156 Standard
- Improves abrasion-resistance, reduces surface dusting
- Reduces staining and color variations common to other curing methods
- Reduces project timeline
- Easy-to-use for concrete placement companies and/or concrete polisher

CRETE COLORS
INTERNATIONAL

CRETE COLORS INTERNATIONAL

At Crete Colors International, our expertise is focused on bringing state of the art treatments to concrete floors. Our dedication to making cost-effective, planet safe and easy-to-use high performance products is the foundation of our business.

The C² brand is currently present in over 40 countries and we are consistently uncovering new opportunities for expansion. We pride ourselves on our global network or, what we like to call our "C² Family."

Simply put, we are here for you.
