

C² Degrease

Industrial strength detergent for concrete floors.

C² Degrease is an environmentally responsible alternative to harsh industrial degreasing solvents, formulated to remove oil, grease films, adhesive residue, and rubber tire marks from concrete floors. It effectively cuts through fuel and atmospheric soiling without the use of acids, caustics, or aggressive solvents common in many degreasers.
C² Degrease is ideal for preparing warehouse and industrial floors for long-lasting protective treatments and coatings.

- Quickly cuts and emulsifies all types of grease and oil.
- Removes many adhesives and paint residues.
- Concentrated for economy. Dilute with 4 to 200 parts water.
- Safer alternative to ketone, benzene, chlorinated, aromatic and other aggressive solvent cleaners.
