

C² PIN FIX

Liquid pin hole, fine crack and gap filler for grinding and polishing.

C² Pin Fix mixes with the dust created while grinding concrete floors to create a super-durable material that automatically fills pinholes, pop-outs, and micro-cracks in the concrete surface. A surface treated with C² Pin Fix polishes faster and easier, and accepts hardener/ densifiers, protective treatments, and color more evenly.

- Quickly cures to concrete hardness
- Dilutable with clean water to meet a variety of job site and equipment conditions
- Treated floors are easier to maintain; less likely to trap dirt and other contaminants
- Treated surfaces polish faster and easier
