

C² SALT SAFE

Deeply penetrating water & salt barrier for concrete.

Concrete surfaces like sidewalks, parking decks and driveways face tough conditions during the colder months that can accelerate deterioration. C² Salt Safe is a ready-to-use water-based, VOC compliant silane/siloxane water repellent and “chloride screen” for the protection of concrete and masonry.

- Provides protection against de-icing salts & salt air
- Long lasting protection produced by deep penetration within the concrete or masonry substrate
- Treated surfaces breathe; does not trap moisture
- Economical, low cost protection ; Extends the life of your floor
