

C² TINT

Color that lasts.
Concrete that performs.

C² Tint brings life to dull gray concrete, creating decorative, low-maintenance flooring with unlimited color possibilities. Its water-based formula penetrates and colors without damaging the surface and can be layered for custom results. Pair with C² hardeners and protective treatments for vibrant, durable floors with a high-gloss finish.

- Adds color & depth to diamond-polished concrete
- Enhances integrally colored, acid stained, color hardened or concrete colored with solvent based dyes.
- Penetrates deeper than acid stains or conventional color pigments.
- Will not peel or flake.
- Ideal for use under C² lithium-silicate hardeners/densifiers.
